COMPLETED ISSUES

OUTREACH

COLBERT LANDFILL, SPOKANE COUNTY, WA

- Spokane County had an Open House on December 7, 1994, to show-off their new Air-Stripper Treatment Facility to the local community. About 30 local residents attended to see the completed project that they have watched progress from the discovery of a problem to the completion of a solution. The citizens appreciated being involved in the project and were encouraged by the final product. The extraction and treatment system is in full operation and is expected to be operated for decades.
